

Amendments to the Claims:

This listing of claims will replace all prior versions, and listings of claims in the application:

Listing of Claims:

1-24. (Cancelled)

25. (Currently amended) A sanitary seat cover assembly for a toilet bowl seat, said sanitary seat cover assembly comprising:

sanitary seat covers having a body part covering a top surface of the seat with a predetermined area range and a neck part corresponding to a portion where the seat is hinged by a part of the seat; and

a supporting frame for maintaining the shape of the sanitary seat covers, the support frame having a clamp,

wherein the clamp selectively fixing the neck part of the sanitary seat covers at the part where the seat is hinged,

wherein the supporting frame includes an external frame to cover around an edge of the sanitary seat covers in a shape of a plate facing one side of the sanitary seat covers fixed by the clamp,

wherein the external frame being selectively attached or detached from the supporting frame and the external frame detachably including an auxiliary frame having a portion cut to a depth in a piling direction of the seat covers, and coverlets being fixed along at least one of a front, a center in a width direction and a back side of the auxiliary frame,

wherein the auxiliary frame being rotated around a hinged portion of the supporting frame,

wherein additional coverlets is mounted over the supporting frame of the sanitary seat covers to selectively cover an external portion of the sanitary seat covers along with the supporting frame, thereby preventing the sanitary seat covers from being exposed to an outside humid environment, and

~~The sanitary seat cover assembly according to Claim 22, wherein the coverlets~~
comprise four coverlets: a first coverlet fixed at the external frame; a second coverlet extended
with a predetermined width in a direction of the external frame; a third coverlet extended with a
predetermined width in a direction of an internal frame along the external frame; and a fourth
coverlet extended to a bottom of the supporting frame from a bottom of the internal frame, and
respective coverlets are overlapped one with another at a predetermined width and are made of a
material that is flexibly transformed when the sanitary seat covers are withdrawn.

26-27. (Cancelled)

28. (Currently amended) A sanitary seat cover assembly for a toilet bowl seat,
said sanitary seat cover assembly comprising:

sanitary seat covers having a body part covering a top surface of the seat with a
predetermined area range and a neck part corresponding to a portion where the seat is hinged by
a part of the seat; and

a supporting frame for maintaining the shape of the sanitary seat covers, the
support frame having a clamp;

wherein the clamp selectively fixing the neck part of the sanitary seat covers at
the part where the seat is hinged,

wherein the supporting frame includes an external frame to cover around an edge
of the sanitary seat covers in a shape of a plate facing one side of the sanitary seat covers fixed
by the clamp,

wherein the external frame being selectively attached or detached from the
supporting frame and the external frame detachably including an auxiliary frame having a
portion cut to a depth in a piling direction of the seat covers, and coverlets being fixed along at
least one of a front, a center in a width direction and a back side of the auxiliary frame,

wherein the auxiliary frame being rotated around a hinged portion of the
supporting frame,

wherein the sanitary seat covers further include a withdrawing grip which is
extensively protruded from an edge of the body part,

~~The sanitary seat cover assembly according to Claim 5~~, wherein a top of the sanitary seat covers are folded, and a plurality of withdrawing grips extending from a top edge of the body part are folded to an opposite side with external portions piled and fixed by the clamp.

29. (Previously Presented) The sanitary seat cover assembly according to claim 28, wherein the supporting frame of the sanitary seat is divided into top and bottom portions corresponding to a shape of half-folded sanitary seat covers.

30-37. (Cancelled)

38. (Previously Presented) A sanitary seat cover assembly for a toilet bowl seat, said sanitary seat cover assembly comprising:

sanitary seat covers having a body part covering along a top surface of the seat with a predetermined area and a neck part corresponding to a portion where the seat is hinged at a part of the seat; and

a supporting frame for maintaining the shape of the sanitary seat covers, the support frame having a clamp,

the clamp selectively fixing the neck part of the sanitary seat covers at the part where the seat is hinged,

coverlets mounted over the supporting frame of sanitary seat covers to selectively cover an external portion of the sanitary seat covers along with the supporting frame, thereby preventing the sanitary seat covers from being exposed to an outside humid environment,

the coverlets including four coverlets: a first coverlet fixed at the external frame; a second coverlet extended with a predetermined width in a direction of the external frame; a third coverlet extended with a predetermined width in a direction of an internal frame along the external frame; and a fourth coverlet extended to a bottom of the supporting frame from a bottom of the internal frame, and respective coverlets being overlapped one with another at a predetermined width and being made of a material that is flexibly transformed when the sanitary seat covers are withdrawn out.
